Office Action Summary

Art Unit 1771

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-5, drawn to a water-borne polyurethane resin adhesive composition, classified in Class 528, subclass 1+.

II. Claim 6, drawn to a method of manufacturing artificial leather, classified in Class 156, subclass 60+.

2. III. Claim 7, drawn to artificial leather products, classified in Class 428, subclass 1+.

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to an adhesive composition and the method of using the adhesive composition to make artificial leather by a dry laminate process, when e.g. a wet laminate process could be also utilized. Note also that the inventions relate to a composition and a method of making an article which are believed to be patentably distinct for the reasons indicated above.

5. Inventions Group I and Group III are unrelated. Inventions are unrelated if it can be shown that they are not

Art Unit 1771

disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to a composition and an article which can be made by using a method which utilizes the composition of Group I. As such, the two inventions are believed to be patentably separate and distinct.

6. Inventions Group II and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as by a wet laminate process.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

8. A telephone call was made to Stephen Adrian on August 21, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be

Art Unit 1771

amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Zirker whose telephone number is (703) 308-0031. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be reached on (703) 308-2414. The fax phone number for this Group is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
